

*International Journal of  
Bioelectromagnetism  
Vol.12 No.4, August 2010*

## FOREWORD

This issue 4 of IJBEM Vol. 12 is the continuation of the special issue on Biosignal Interpretation presenting selected 6 papers from the 6th International Workshop on biosignal interpretation (BSI2009) held in Yale University (June23-26, 2009.) This volume focuses on topics on advanced biosignal instrumentation and signal processing and analysis methodology whereas the papers in the previous volume put stresses on physiologic interpretations of the biosignals. IJBEM is extending the scope of the journal to cover advanced methodology for the broad range of biosignal processing, analyses and interpretation. This volume is an example of envisioning this direction.

Editor in Chief, IJBEM

Dr. Kazuo Yana

*Dept. of Applied Informatics, Hosei University, Tokyo*

Guest Co-Editor,

Dr Ki H Chon

*Life Sciences and Bioengineering Center, Worcester Polytechnic Institute, MA*
