

FOREWORD

This issue of IJBEM includes selected papers presented at NFSI & ICBEM 2011: The 8th International Symposium on Noninvasive Functional Source Imaging of the Brain & Heart and the 8th Intl. Conference on Bioelectromagnetism held in Banff Alberta, Canada on May 13-16, 2011. The issue is the second part of the publication out of the conference and includes selected papers on the heart bioelectrical signals, modeling and noble methods of biosignal analyses. Readers will learn the latest trends in the field of noninvasive functional source imaging and study of bioelectromagnetism through this issue together with the previous issue. This volume also includes a regular paper on auditory brain functioning associated with MEG.
